

Energy Transfer - Wind Turbine

ET-8783

What's included

- Fan
- Spacer
- Thumb nut

Equipment setup

The Wind Turbine accessory is designed to be attached to the Energy Transfer Generator to create a wind energy turbine. There are two versions of the Energy Transfer Generator: ET-8771A and ET-8771B. Follow the directions below for your version of the Energy Transfer generator.

ET-8771B instructions

1. Remove the knob and three-step pulley from the ET-Generator.
2. Slide the spacer that comes with the Wind Turbine onto the generator shaft.
3. Push the Wind Turbine onto the generator shaft so that the turbine blades curve away from the generator. Note that the Wind Turbine fits tightly on the generator shaft.
4. Screw the ET-Generator knob onto the shaft. Do not use the thumb nut that comes with the Wind Turbine.

ET-8771A instructions

1. Remove the thumbnut and three-step pulley from the ET-Generator.
2. Slide the spacer that comes with the Wind Turbine onto the generator shaft.
3. Push the Wind Turbine onto the generator shaft so that the turbine blades curve away from the generator. Note that the wind turbine fits tightly on the generator shaft.
4. Screw the thumbnut that comes with the Wind Turbine onto the shaft.
