

pH 707B Soil pH Tester

The pH-707B is a versatile pH meter suitable for soil and water quality measurement. Designed for measuring the acidity and alkalinity of soil and liquids. Featuring a pointed electrode head, it can easily penetrate and measure the pH of moist soil. With an automatic calibration function for pH6.86 and pH4.01, it ensures accurate and reliable results. Additionally, the built-in thermometer displays ambient temperature, providing users with comprehensive testing experience.

Key features include:

- Pointed electrode head design, ideal for soft materials
- Automatic calibration function (pH6.86 and pH4.01)
- Built-in thermometer for ambient temperature display
- Wide measurement range, meeting various needs

Specification

- pH Range: 0.00 ~ 14.00 pH
- Temperature Range: 0.0 ~ 50.0 °C (32 ~ 122 °F)
- Accuracy: ± 0.02 pH / 1 °C (2 °F)
- Resolution: 0.01 pH / 0.1 °C

Features

- Auto Power Off (8 minutes)
- Replaceable Electrode: Yes
- Replaceable Metal Tip: Yes

Attributes

- Operating Environment 0 ~ 50°C
- Storage Environment -10 ~ 50°C / less than 80%RH (non-condensing)
- Altitude Limit below 2,000 m
- Power Supply 1.5V AA battery x 2
- Dimensions 350 x 40 x 25 mm
- Weight approx. 231 g
- Accessories: User manual
